

PHp Engineering Repository REgression Tool (PHERRET)

AKA Phoenix HElios Repository REgression Tool

PHERRET is an open-source application for the Behat/Mink community.

PHERRET can be deployed on an existing server and through a simple config file will open a portal for manual QA testers to access and run BDD Feature files with no prior programming experience.

Test Suites can be created, saved, shared, and uploaded.

Config file needs to route/point to the following:

Security: VPN access

Envrionments: Dev(optional), QA, STG, PROD

Browser: Firefox, Chrome, IE(optional)

Repository: local repository (server)

GitHub: links to Feature files

DataBase: Store user profile
